

Did you know?

Up to 30% of men with a negative prostate biopsy result actually have undetected cancer?¹

Unfortunately, today's gold standard for prostate cancer diagnosis, the biopsy procedure, provides less than a 1% sample of your entire prostate.² Prostate cancer may be present in one or more small tumors and there is a risk the biopsy needle could have missed it.

ConfirmMDx tests the DNA from your previous biopsy sample to determine your risk that the needle may have missed the tumor. It requires no additional procedure and there is no out-of-pocket cost for Medicare beneficiaries.

**Print this discussion guide and take it to your next doctor's appointment.
Ask if ConfirmMDx may be right for you.**

Answer This:

Have you had a prostate biopsy in the last 30 months?

Yes No

Ask This:

- Does an elevated PSA level mean that I have prostate cancer?
- Is it possible I have prostate cancer that is undetectable by biopsy?
- Is ConfirmMDx right for me?

1. Aubry et al. American Health Drug and Benefits 2013;6(1):15-24. 2. Ross et al. Cancer Epidemiol Biomarkers Prev 2008;17(3).

Why do I need ConfirmMDx?

Although 1 in 6 men are diagnosed with prostate cancer during their lifetime, the vast majority of men have a negative prostate biopsy result. Your urologist may have concerns about your risk for undetected clinically significant prostate cancer and recommend ConfirmMDx to determine your need for a repeat biopsy.

ConfirmMDx can provide your urologist with actionable information that helps:

- Confidently rule out prostate cancer-free men from having an unnecessary repeat biopsy procedure.
- Determine if you are at high risk for prostate cancer and may need a repeat biopsy and potential treatment.

Will my insurance cover ConfirmMDx?

Traditional Medicare beneficiaries have no out-of-pocket patient cost for testing. Benefits coverage varies depending on your individual health insurance plan. If you have questions regarding your health insurance coverage, MDxHealth representatives are available from 9:00am to 5:00pm PST, Monday through Friday, toll free at **(866) 259-5644** or by email at **PatientFirst@MDxHealth.com**.

Where can I get the ConfirmMDx test?

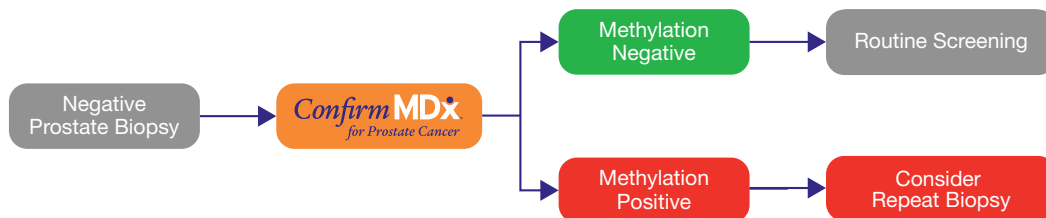

Ask your urologist about getting the ConfirmMDx test. They can request your tissue samples from your previous biopsy for testing. **NO ADDITIONAL PROCEDURE OR OFFICE VISIT REQUIRED.**

For Healthcare Providers

ConfirmMDx provides molecular diagnostic information to aid in the identification of clinically significant prostate cancer.

Patient Eligibility:

A patient with a cancer-negative prostate biopsy, including benign, HGPIN, atypical and/or ASAP histopathology findings are eligible; specimen must have been collected within 30 months from date of receipt at MDxHealth.

For more information: **866-259-5644** or **info@mdxhealth.com**

MDxHealth Inc. is regulated under the Clinical Laboratory Improvement Amendments of 1988 (CLIA) as qualified to perform high-complexity clinical testing. The ConfirmMDx for Prostate Cancer test was developed and its performance characteristics determined by MDxHealth. It has not been cleared or approved by the US Food and Drug Administration. The test results should be interpreted in conjunction with other laboratory and clinical data available to the clinician and relevant guidelines on the decision for biopsy.
